

CHILLED AND ULTRA-CHILLED FOOD PRODUCTS DELIVERED IN THE CITY CENTRE EVERY DAY

STEF and “Les Triporteurs Rennais” ride together in the city centre!

In partnership with “Les Triporteurs Rennais” (a company specializing in city centre parcel deliveries by tricycles), STEF (the European specialist for food logistics) commissioned a test electric tricycle equipped with a thermobox prototype for daily deliveries of chilled and ultra-chilled food products to its clients (retailers and restaurants) in the city centre.

This zero noise and zero CO₂ proximity solution is most convenient for the last mile leg of deliveries in the most restricted and constraining urban areas: densely populated zones, pedestrian zones or zones where motor vehicles are prohibited.

This STEF initiative offers flexible and reactive solutions to consignees who can schedule delivery times from 6 am to 8 pm, Monday to Saturday, and book several deliveries per day depending on business fluctuations or product shortage.

STEF guarantees the safety of food products transported and an unrivalled proximity delivery without disturbing residents nor the local traffic.

With STEF and “Les Triporteurs Rennais”, retailers and restaurants have a winning recipe for their deliveries of chilled and ultra-chilled food products in the city centre.

Want to ride along ? Hop in and check it out on [YOU TUBE](#)
